

Between Sky and Earth: The Explorers of the Karakoram and Himalaya Ranges

Table of Contents (annotated)		Page
Introduction		1
Chapter 1	Coming to Terms with the Environment	7
	Fixes the geographical setting of Karakoram and Himalaya and some of the challenges of that environment.	
Chapter 2	Surveying—How Hard Can It Be?	22
	Surveying was a difficult process in the 19 th and early 20 th century, gives some of the background on how it was conducted.	
Chapter 3	Modern History, the Essentials	35
	Brief overview of the history of the Indian Subcontinent	
Chapter 4	The First European Explorers	43
	Summary of the first European scientist and explorers to venture into the Karakoram-Himalaya.	
Chapter 5	Younghusband: Explorer, Politician, Eccentric	59
	This is the first explorer to gain a considerable amount of notoriety. He became very influential in the British climbing circle during the first two decades of the 20 th century.	
Chapter 6	Renaissance Man	74
	William Conway was multi-talented but only led one expedition.	
Chapter 7	Douglas Freshfield and Co.	84
	Another talented Brit, he circumambulated Kangchenjunga in 1899.	
Chapter 8	Eckenstein and His Eclectic Friends	95
	Eckenstein led a 1902 expedition to K2 that included A. Crowley.	
Chapter 9	Dr. Thomas Longstaff	99
	One of the early giants of KH exploring and mountaineering. He was very influential in the early 20 th century and admired by the likes of Tilman, Smythe, Shipton.	
Chapter 10	The Duke	114
	A summary of the 1909 Italian Baltoro Glacier Expedition- which has to go down in history as one of the most significant of all time.	
Chapter 11	The Quiet Doctor	124
	Dr. Kellas kept a low profile and unfortunately wrote very little about his adventures in Sikkim. One of those personalities few people have hear about but should be recognized for his work.	
Chapter 12	Dr. and Mrs. Workman, Part 1	134
Chapter 13	The Workmans, Part 2	148
Chapter 14	The Workmans, Part 3	160
	This American couple were prolific in their travels- covering more millage in the KH than anyone. They had their issues but took on the role of surveyors and explorers.	
	<i>The Mystery of Saltoro Pass</i>	178
	I inserted an aside at this juncture because the Saltoro Pass was one of those fabled links between northwest India and Tibet. However, no one knew where it actually was or whether it existed at all.	

Chapter 15	The Return of Dr. Filippo De Filippi	182
	Dr. De Filippi was on the Duke's 1909 Baltoro expedition, but came back in 1913-1914 to lead a very ambitious expedition that wintered over in Skardu, and then explored the Rimo Glaciers and terrain to the north.	
Chapter 16	Kenneth Mason	194
	Mason was a surveyor with the Survey of India in the 1920's and later a professor of Geography. He was instrumental in documenting earlier explorers and led the effort to standardize the names of geographic features in the KH.	
Chapter 17	The Dutch Connection	201
	This chapter is an overview of the expeditions led by the Dutch couple- the Vissers in the Karakoram in the 1920's and 1930's.	
Chapter 18	Another Italian Duke Enters the Karakoram	212
	The Duke of Spoleto led an expedition in 1929 to the Baltoro Glacier and Shaksgam Basin.	
Chapter 19	The 1930s: Mountaineering Begins in Earnest	217
	It was in the early 1930's that number of expeditions to the KH with the sole purpose of mountaineering started to increase.	
Chapter 20	Sikkim Summits	226
	Documents expeditions that occurred in Sikkim in the 1930's where they made a number of first ascents.	
Chapter 21	Masherbrum	232
	The 1938 effort to reach the top of this massive twin summit peak by a small British expedition. It started off well but the weather took its toll.	
Chapter 22	The Swiss Arrive in Garhwal	239
	The Swiss ventured across Garhwal in the summer of 1939 and had considerable success but had trouble on Chaukhamba.	
Chapter 23	The Triumvirate, Part 1	248
	This is the first of three chapters that covers the adventures of Tilman, Shipton and Smythe. In Part 1 is a summary of the amazing summer of exploration in the Garhwal by Shipton and Tilman in 1934.	
Chapter 24	The Triumvirate, Part 2	268
	Frank Smythe's four month mini-expedition in the Garhwal to collect flowers/plants as well as climb. He documents life in the Valley of Flowers which has since become a National Park and UNESCO site.	
Chapter 25	The Triumvirate, Part 3	280
	The summer of 1937 saw Shipton leading an expedition into the central Karakoram and Aghil Ranges primarily to conduct topographical surveys. Tilman was part of the team as well.	
Chapter 26	Everest: Beginnings and the 1921 Reconnaissance	302
	This sets the stage for the subsequent British expeditions to climb the mountain that they pretty claimed to be their own.	
Chapter 27	Everest: 1922 and 1924	313
	George Mallory was a member of both of these expeditions. Climbers were able to reach altitudes over 27,000 ft.	
Chapter 28	Everest: Fresh Blood	325
	The highlights and low points of all of the British expeditions which took place in the 1930's.	

Chapter 29	Himalayan Kingdom of Nepal	335
	Nepal had been closed to foreigners until 1949, hence there had been few legal expeditions until then, hence it is time to give a little history of this nation.	
Chapter 30	Everest: At Last!	344
	The reconnaissance of 1950 as well as the Swiss attempt and finally the 1953 British Expedition.	
Chapter 31	Thunder Dragon: Bhutan	354
	One of the more mysterious Himalayan countries needs a short introduction before giving an overview of the few expeditions that have crossed its borders.	
Chapter 32	The Eastern Himalaya	368
	Everything east of Bhutan is what I consider the Eastern Himalaya. This is the most remote part and hence least visited, now and then.	
Chapter 33	The Big Peaks—What Took So Long?	375
	Mountaineers had been going above 27,000 ft on Mt. Everest since the 1920's, hence we have to ask the question: why did it take so many decades for the fourteen 8000 m peaks to be climbed? I attempt to answer that question as well as provide some context of the evolution of high altitude mountaineering from the early days to the 'extreme' climbs that have occurred in recent decades.	
Chapter 34	Conclusions	386
	I provide some thoughts on the Siachen Glacier conflict between India and Pakistan. But end with an overview of several long watershed to watershed treks/routes that have been accomplished and would provide contemporary mountaineers/trekkers with some serious adventure of their own.
